

Walter Wahli, Ph.D

Professor of Metabolic Disease,
Lee Kong Chian School of Medicine,
Imperial College London & Nanyang Technological University

Prof Wahli is internationally recognised for his contributions to the area of energy metabolism. He has provided fundamental insights into the functions of transcription factors (PPARs) activated by fatty acids and eicosanoids. His discoveries contributed in advancing our understanding of the molecular mode of action of these natural compounds, which signaling impacts most key biological processes in vertebrates.
